Workshop on Past Life Regression & Spiritual Science

Dates: 25th & 26th June, 2026 (2 days workshop)

Facilitators: Dr. Newton Kondaveti MBBS & MD, and Dr. Lakshmi Newton, MBBS

OBJECTIVE:

Past-life-regression works on the principle of cause and effect and helps remove the effects by addressing the root causes. By going to a root cause and understanding how it has affected the present, profound natural healing takes place automatically. According to this principle; when the effect is forced back to the cause, the effect vanishes. Past-life-regression works simultaneously on Body, Mind, Emotions, and Spirit and heals at all levels. There is an old saying - "To re-live is to relieve". Once a traumatic or unpleasant situation is relived during the regression, it results in greater understanding at deeper levels of the psyche. Therefore, once the buried trauma is brought to the conscious awareness through regression, the problems start clearing up automatically and naturally.

BENEFITS:

Healing of chronic diseases is brought about through the understanding of karmic patterns and the removal of energy blockages.

- * Relief from all kinds of specific phobias by having an understanding of their specific causes, which in many cases are present in the previous lives.
- * Improvement in inter-personal relationships, thus putting an end to baseless clashes and friction with one's lifetime relations.
- * Freedom from the fear of death as a far wider and deeper perspective on the cycle of life & death is gained.
- * Helps to retrieve talents and skills from other lifetimes.
- * Helps to know the purpose of one's life by viewing the blueprint for this lifetime.
